Introduction

An evaluation of an average website shows that at least 70% of the traffic comes from visitors who are using mobile devices. This only proves that most users of the internet and other online tools make more use of their mobile phones and other portable devices (laptops, tablets, etc.). The world of computer technology is shifting towards the mobile phone because of its comfort, mobility, and other related advantages. Over the last decade, there have been tremendous improvements in the mobile industry with corresponding developments in the user base. This trend is believed to improve further at a greater rate in the coming decade. In general, statistics have shown that about 78.9% of internet users make use of mobile devices. This represents about 36.9% of the world population.

ABOUT EXENOX MOBILE

The EXENOX SmartPhone

SMARTMINER & SMARTNETWORK

A multi-purpose **blockchain integrated** smartphone with mobile mining capabilities designed to connect the user to various mobile applications and network providers. The Exenox Smartphone is designed for ease of blockchain to mobile integration and use.

EXENOX Mobile designs, brands and creates blockchain-integrated mobile devices with high technological requirements that offers durability and excellent usability spurring a friendly ecosystem that makes life easier and smarter.

Our Core

Engendering mass adoption via

- Innovative smart phone
- Power-friendly mobile miner
- Intelligent smart network
- United user ecosystem
- The first large-scale integration of the blockchain technology with the mobile industry

EXENOX Mobile Mining & Smartphone

The First Generation Mobile Phone on the Blockchain that includes an Eco-friendly mobile mining application. In addition to top of the line features, app store, security, inbuilt applications to provide our customers quality products.

Work SMART!

What we do!

Smart Mining

- Mine EXENOX tokens.
- Earn bonuses and rewards.
- Use EXENOX tokens to purchase online.
- EXENOX smartphone users get more mining rewards.
- Available for Android and iOS users (soon).

Smart Products

- Smartphone & Smartphone +
- Mobile Enabled Tablet & Tablet +
- Headphone & Headphone +
- Wireless Charging Stations
- Bluetooth Speakers
- Smart Wrist Bands and Smart Watches
- The smart Social Network with smart business functions

Smart Network

EXENOX Mobile's core will be its strong community of product users united together with the mobile network and the blockchain technology through:

- The EXENOX mobile products (smartphones & tablets).
- The EXENOX Smart Mining app.
- The EXENOX blockchain app and dApp store.
- Pre-installed blockchain applications.
- Network provider services.
- Other mobile market innovations in the future.

The Future of Mobile SmartPhone is here

The EXENOX SmartMiner

The EXENOX smartphones are linked to the blockchain supporting a virtual mining mobile application. The EXENOX phone mobile mining app and EXENOX tokens will be available globally. Users with or without the EXENOX mobile phone can download our mobile mining application on the iOS App and Google Play stores.

Growing Global Smartphone Network

The number of smartphone users is forecasted to grow from **2.1 billion** in 2016 to around **2.5 billion** in 2019, with smartphone penetration rates increasing as well. Just over 36 percent of the world's population is projected to use a smartphone by 2018, up from about 10 percent in 2011. – Statista.com

The Exenox miner uses the Exenox Proof of Relevance mechanism

The Exenox Mobile Miner, also known as Exenox Token Generator is a simple cryptocurrency cloud mining app. The application uses the proposed Exenox Proof Of Relevance mechanism to distribute hourly allocated tokens to all active nodes. A node is a single instance of the Miner capable of receiving and distributing tokens to various wallets or operating accounts.

At the moment, the Exenox Mobile Miner is still at the experimental stage but utterly harmless as it requires very little permissions from the host device and does not utilize the device's resources in the mining operation. Rather, all operations are done from the Exenox cloud server. The miner is only capable of Mining EXNX tokens at this stage. Efforts are on the way to add BTC, ETH, and LTC which will proceed the set up of the Exenox POW mining pool. Since this application uses our cloud server to mint and allocate tokens, the node runs continuously on the server even after the user logs out of the application. You do not need to keep the app running in the background.

Network Provider Services

EXENOX will introduce a global facility for the customers to purchase airtime and data plans from multiple mobile service providers across the world using EXENOX tokens. Negotiations are on the way with reasonable progress at this front.

Airtime/Data Service

Work with wireless carrier to accept crypto payments

The Emerging SmartPhone

The EXENOX Smartphone that will be cost effective for the emerging market

Emerging Market Support

Subsidized Mobile rates for areas with low income

EXENOX EMERGING MARKET

Profits will be shared to support the global emerging market and low income household support

MISSION STATEMENT

We at EXENOX Mobile take pride in our efforts to become the world's first manufacturer of innovative smartphones with a power-friendly crypto mining solution. We believe that smartphones should not simply be products used for communication and information distribution. Our EXENOX smartphones will utilize Android OS with an in-built mobile mining application to earn tokens, rewards and additional bonuses. Our mission is to give our consumers an opportunity to mine EXENOX tokens and other cryptocurrencies and earn dividends for using the EXENOX smartphone thereby generating passive income. Aside our mobile mining solution, users can use their EXENOX smartphones in many other ways such as payments for a wide array of online products and services. We also aim to make our smartphones affordable to everyone and everywhere. Therefore, we will also distribute our smartphones to low income areas/societies at subsidized prices. Furthermore, other smartphone brand users worldwide can also download our mobile mining application on the Apple iOS Store and Google Play Store to earn EXENOX tokens, rewards and additional bonuses.

Engendering greater Usability, availability and affordability of smartphones and blockchain tools

*As at July 2018, the world population is estimated at 7.6 billion. The estimated number of mobile users is about 4.57 billion. This volume compared to the estimated number of blockchain users or people with the knowledge of the blockchain (which is estimated at 5% of the total world population) is remarkably huge. Thus, creating a huge potential for a relationship between the blockchain and the mobile technology which remains largely untapped till date. If this gap is appropriately bridged, there will be a high propensity for mass adoption of the blockchain technology and cryptocurrency. Therefore, **EXENOX** Mobile Technology seeks to bridge this gap by inventively deploying affordable mobile devices with tools and programs that are targeted at solving the everyday need of both the common populace and the rare high side of every society.*

WALLET

WALLET

With biometric features locked into the blockchain tools providing an extra level of security that guarantees a state of the art digital mobile wallet. Our wallet is built to offer a friendly relationship with other crypto currencies via atomic swap as well as direct relationship with fiat in licensed countries.

EX6

EXNX

The EXNX Token can be stored on any TRC20 compatible Tron wallet. This gives the user full custody of their funds as the private keys are sole properties of the owners which gives them the exclusive right and privacy over the wallets.

EXNX

Recommended Wallets

- Exenox Vault (To be launched on March, 2021)
- TronLink
- Trust Wallet

EXNX

The Exenox wallet provides secure transactions with very low fees that matches no other.

WELCOME TO THE WORLD'S FIRST BLOCKCHAIN 3D SMART PHONE

Full specifications and product details available on request

Speed & Storage

- Qualcomm Snapdragon 835 (2.5 MHz)
- 8GB RAM
- 256GB ROM
- Expandable Storage up to 256GB

Biometric Security

- Side Fingerprint ID
- Fast face ID

Camera & Screen

- 24.0MP f/1.8 Rear Camera
- 13 MP Front Camera
- 5.99 OLED Display
- 90%+ Screen to body

More Features

- Fast Charge/Wireless Charge
- Corning Gorilla Glass Front/Back
- Built in Cryptographic Wallet
- 3D display
- Pop up front camera
- 4G Network

THE EXNX

The Exenox token (EXNX) is an TRC-20 smart contract built on the Tron blockchain. The EXNX is a place holder for the EX6. The EX6 is a token built on the EX6 blockchain. It is a blockchain that is planned carefully from the ground up to support the Exenox Proof of Relevance Mechanism which evaluates the relevance of a node (a wallet with node's characteristics) taking multiple constraints to account while selecting which node validates a transaction and for which node receives a reward. The EXNX token is a 5% supply of the EX6 Coin.

EXENOX TUBE

Get video revolution freedom

The Exenox Tube is a freemium cutting edge innovation by the Exenox project to design and build a video social media platform for both individuals and businesses. It is a platform that provides a means of expression via video and textual contents.

Over the past few years, the blockchain technology has experienced a fair share of controversial removal of its contents from major platforms like Facebook and the Google's YouTube.

Exenox seeks to remedy this by providing a Blockchain targeted social media platform which will offer a great deal of help to the industry and other related content providers.

BE FREE TO EXPRESS

10 *Important* Features

Welcome to a world of video revolution

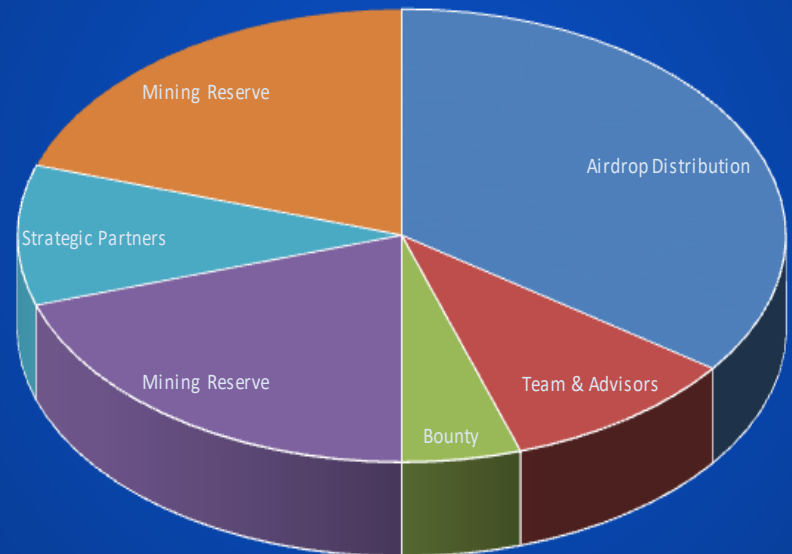

1. Video upload and "controlled" download:
Upload your tutorials, fun videos, documentaries, movies etc.
2. Friendly and interactive commenting, like and dislike functions.
3. Full video performance reporting system:
 - Video views
 - Analytics and Charts
 - Likes and dislikes
 - Comments etc.
4. Monetize your videos
Choose which video to monetize and earn from your contents. Present a short clip as a preview for your long premium videos.
5. Create a channel.
Create your own channel and upload your videos with total control.
6. Import videos from YouTube
Import your videos from YouTube (from a selected channel or by special tags)
7. Video Quality Selection
Users can select video quality based on the speed of their Internet. Enjoy seamless uninterrupted streaming.
8. Receive tips & Gifts
Receive tips and gifts from friends and associates in (EXNX/ExG) tokens and other currencies
9. Full advert network; submit your ads to reach out to millions of online users. Ads are accepted in textual, image or video format.
10. Earn from advertisers
Users (channel owners) can earn from advertisers. Generate income from every click on ads shown on your uploaded videos.

EXENOX Token Distribution

Our focus at Exenox is to build a strong community with a solid support for our Project and products. Therefore, we are giving the community a higher share of our tokens. This put the power of the market value determination in the hands of the community.

| MAXIMUM TOKENS IN CIRCULATION | | 5,000,000.00 |
|-------------------------------|-------|--------------|

Roadmap

Q4 2019

- ✓ Exenox Mobile Miner Beta Test (Phase 2)
- ✓ Platform Maintenance and Upgrades
- ✓ EXNX Def Token Smart contract release

Q1 2020

- ✓ Mobile Miner (Android) Full release
- ✓ Exchange Listing (DEXes)
- ✓ Community Expansion Program (Phase , 1)
- ✓ Exenox Gas(introduction)

Q2 June 2020

- ❖ Exenox Regional Expansion Program (Regional Campaign)

April 2019

- ❖ Exenox Miner Airdrop Support(Beta Test).
- ❖ Community Expansion Program (Phase , 2)

May 2020

- ❖ Exenox Mobile Vault (Alpha Test)
- ❖ Exchange Listing
- ❖ Exenox Tube Detailed Specifications

July 2020

- ❖ Exenox Mobile Vault Full release
- ❖ Exenox Token Generator (iOS Version)

Q4 2020

- ❖ Exenox Tube
- ❖ CMC Application
- ❖ ExG DeFi Campaign
- ❖ Exswap Test

Aug-Sept 2020

- ❖ Exenox Mobile Advert Network
- ❖ Exenox Tube (Alpha Test)
- ❖ EXNX Trading
- ❖ ES2 Alpha Test

EXENOX

The Team

A decorative graphic consisting of a large dashed circle and a smaller solid circle, both centered on the page. The dashed circle is larger and has two small purple dots on its upper and lower arcs. The solid circle is smaller and is positioned to the right of the dashed circle's center.

Our team consists of businessmen and blockchain enthusiasts drawn from various fields. As a global/international project, we have members from different countries and continents. Presently, we have representatives from United States, Africa, India, United Kingdom, the Netherlands, China and the Philippines. This team consists of very experienced personnel with various levels of expertise in all areas required to make our project a success.

Note: *Some information contained in this document is not final as we are waiting for the report from the government of our proposed country of accreditation to validate the regulatory compliancy of certain parts of the proposed model.*
